I am a fullstack web developer with 10+ years of professional experience. I particularly enjoy doing frontend development and JavaScript, though also comfortable with backend and API development in a number of languages such as Python, Java and server-side JavaScript.

I am a social person and thrive in a strong team, but I am also full of initiative and drive – I will quickly learn new processes, environments and technologies on my own. Regardless of project, I always carry a professional attitude and clear focus on delivering results.

Frameworks:
React, Next.js, Svelte, Angular, Django, Node

Languages:
JavaScript, Python, HTML5, CSS3, Java, SQL

Databases:
postgres, MySQL, DB2

Tooling:
Jest, npm, pytest, Terraform, Webpack, Yarn

Version handling & CM:
Git, CVS, SVN, Confluence, JIRA

Other:
AWS, Ansible, Docker, Jenkins, Linux, REST, Scrum, Vagrant

Swedish: Native
English: Fluent
German: Basic proficiency
Italian Basic proficiency
Japanese: Basic proficiency

EXPERIENCE

FULLSTACK DEVELOPER / Reason Studios   *October 2017 — present*

- Heavily involved in infrastructure and devops including build systems and servers/AWS
- Serving 10 000+ daily end users with always available systems
- Technical responsibility for the web shop, generating 75% of company revenue
- Technical responsibility for authentication and the license systems
- True full stack development from databases via APIs and microservices to frontend
- Quickly got up to speed in new frameworks - Python & Django
